SUMMARY

Mechanical Engineer currently working in reverse engineering of mechanical components, specializing in analyzing existing parts, taking precise measurements, and recreating accurate 3D models and 2D drawings. Proficient in SolidWorks as the primary tool for detailed 3D modeling and engineering documentation. Strong understanding of engineering design principles, manufacturing considerations, and practical industrial applications, ensuring high accuracy and functionality in redesigned components.

KEY EXPERTISE

SOLIDWORKS, DRAFTING, AUTOCAD PLANT 3D, AUTOCAD MECHANICAL, CREO

EDUCATION

VISHNU INSTITUTE OF TECHNOLOGY, Bhimavarm — **2021-2025**
B.Tech. - Mechanical Engineering | CGPA:8.52

SRI ADITYA JUNIOR COLLEGE, Kakinada — **2019-2021**
Intermediate - MPC | CGPA: 9.84

SRI VIDYA TALENT SCHOOL, Yeleswaram — **2018-2019**
10th | CGPA: 9.8

PROFESSIONAL EXPERIENCE

EXPERIENCE 1:

Duration : February 2025 to Till Date
Origination : Praxsol Engineering Private Limited (On-site at Tata Steel, Kalinganagar, Odisha)
Designation : Design Engineer

Duties and Responsibilities:

- Observe and study the part to understand its function, shape, and important features.
- Collect specifications and required details from the Head of Department or senior engineers.
- Take accurate measurements of the component using proper measuring tools.
- Prepare initial sketches to record dimensions and key design elements.
- Check available reference drawings or similar parts for better accuracy.
- Coordinate with senior engineers to clarify technical requirements and confirm details.
- Create detailed 2D drawings in CAD based on the collected measurements and sketches.
- Develop 3D models of the part using Solidworks for visualization and design verification.
- Review and cross-check drawings and models with seniors for corrections.
- Finalize the drawings by adding dimensions, tolerances, materials, and notes.
- Ensure the drawings follow company standards and industry guidelines.
- Submit the final drawing for approval.

Major Components Developed:

- Wagon Tippler Motor Base Frame
- TRF Barrel Harrow Bogie Frame
- Gears (Helical, Bevel, Rack and Pinion, Spur, Internal)
- Pumps, Plummer Blocks, Weigh Feeder, Pulleys and Shafts, Motor internal spare parts
- Roughing Stand - Project Block
- Machinist’s Jack Assembly

EXPERIENCE 2:

Duration : June 2024 to July 2024
Origination : SAP Aerospace (IIT JAMMU, Jammu and kashmir)
Designation : Product Development Intern

Duties and Responsibilities:

- Creating the Piping and Instrumentation diagrams of gas turbine test rig.
- Numerical Investigation of gas turbine combustors.
- Research and Development of Nitrogen, Methane and Hydrogen gases.
- Atomization Testing on Different types of Injectors.

CERTIFICATIONS

- IntroductiontoASME B31.12 Hydrogen Piping and Pipelines

STRENGTHS

- Hard Working
- Team Player
- Self Learner
- Self-motivated with a positive attitude

HOBBIES

- Cricket
- Chess
- Travelling

DECLARATION

- I hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above-mentioned particulars.
